

Falam Keyboard

2026 · macOS, Windows & iOS Guide

This FALAM keyboard (2026) types standard extended-Latin accents plus retroflex ṭ / Ṭ , used in Falam/Mizo orthography.

macOS — Ready to Install (Apple Silicon compatible)

Use Falam_Keyboard_macOS_Ready_to_Install.zip — extract and double-click Install_Falam_Keyboard.command.

After install, log out & back in, then add it: System Settings → Keyboard → Input Sources → + → "Falam Keyboard"

How Typing Works (macOS)

Base layout is identical to standard US English. Option + vowel gives circumflex directly. Other accents use Option + accent key.

Option + a/e/i/o/u	—	â ê î ô û (circumflex — direct!)
Option + ' apostrophe	a / e / i / o / u	á é í ó ú (acute)
Option + ` grave accent	a / e / i / o / u	à è ì ò ù (grave)
Option + 6 circumflex alt	a / e / i / o / u	â ê î ô û (circumflex — alt)
Option + [diaeresis	a / e / i / o / u / y	ä ë ï ö ü ÿ (diaeresis)
Option + Shift + ` tilde	a / o / n	ã õ ñ (tilde)
Option + t	—	ṭ
Option + Shift + t	—	Ṭ

□ Tips

- Direct circumflex: Press Option + a/e/i/o/u for instant â/ê/î/ô/û — no dead key needed!
- Dead-key accents: Hold Option, press accent key, release, then type vowel (for acute, grave, diaeresis, tilde).
- For capitals, use Shift with the vowel (e.g. Option + Shift + A = Â).
- The retroflex ṭ / Ṭ works instantly with Option + t / Option + Shift + t.

Falam Keyboard

Step-by-Step Installation Guide
macOS

By Van Zanniat (Pasui) — 2026

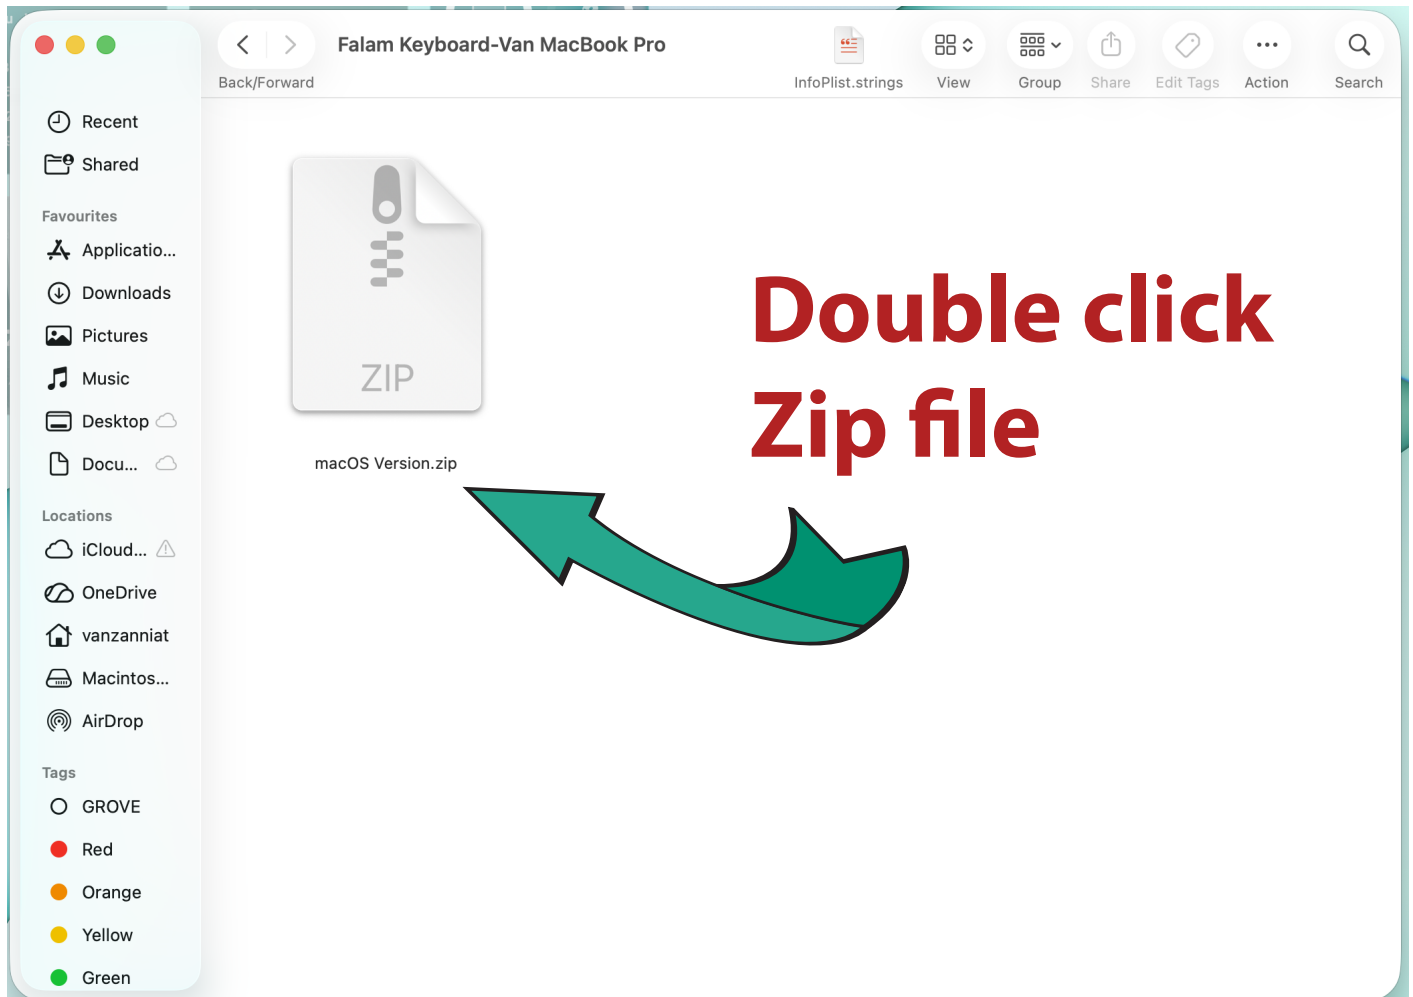

Chin Lyrics Centre — Home of Chin Song Lyrics

vansuilianzanniat@yahoo.com.au

STEP 1

Download the Installer

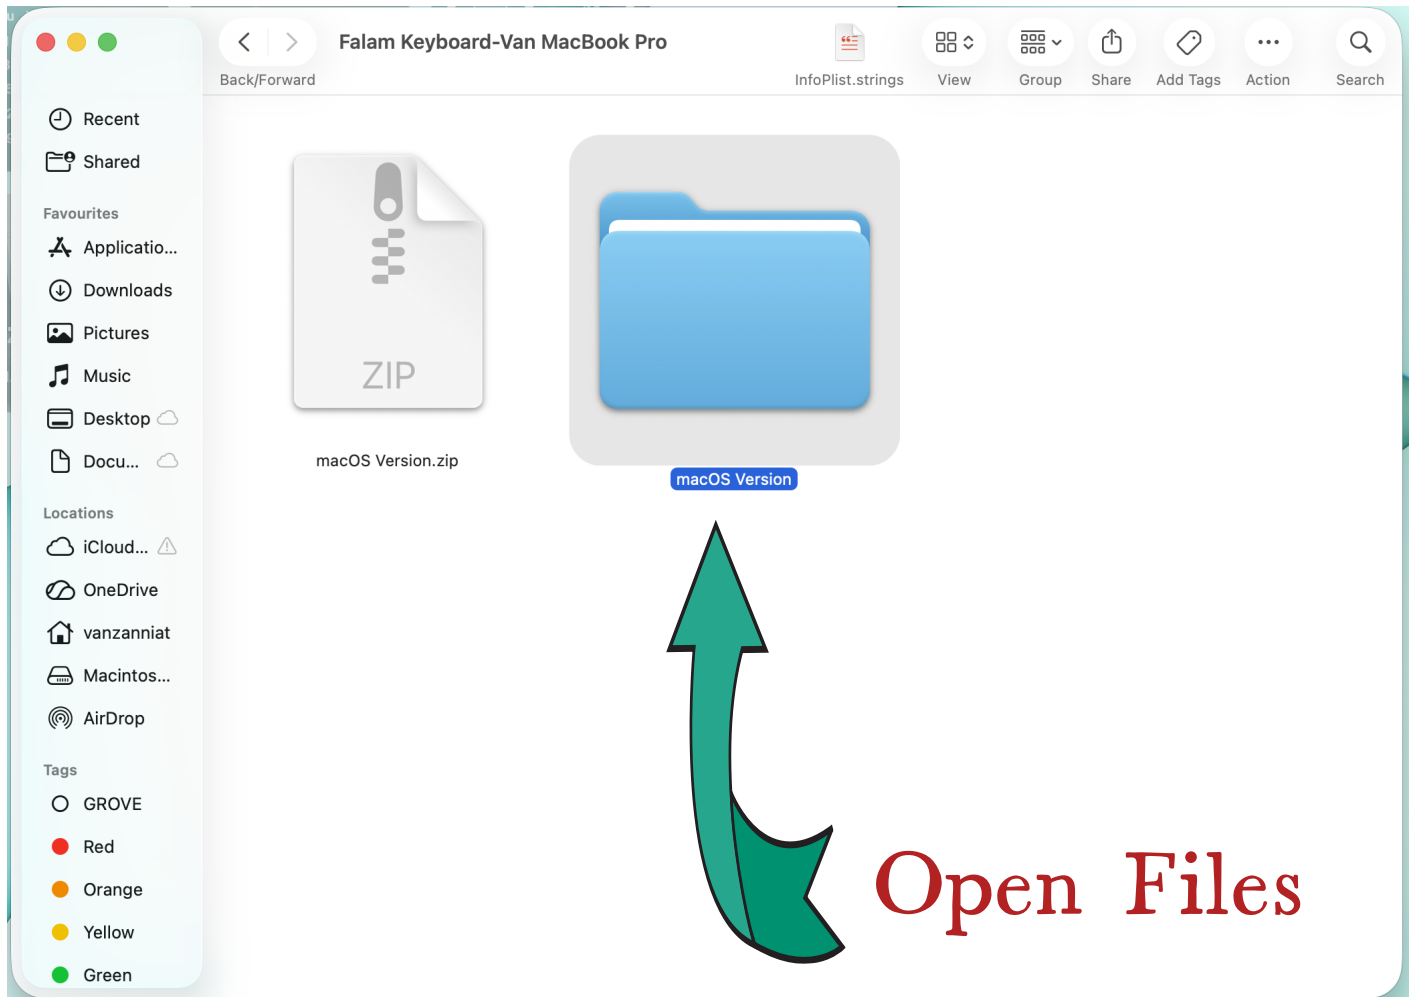

Download the macOS Version.zip file from the website into your Downloads folder.

STEP 2

Extract the ZIP

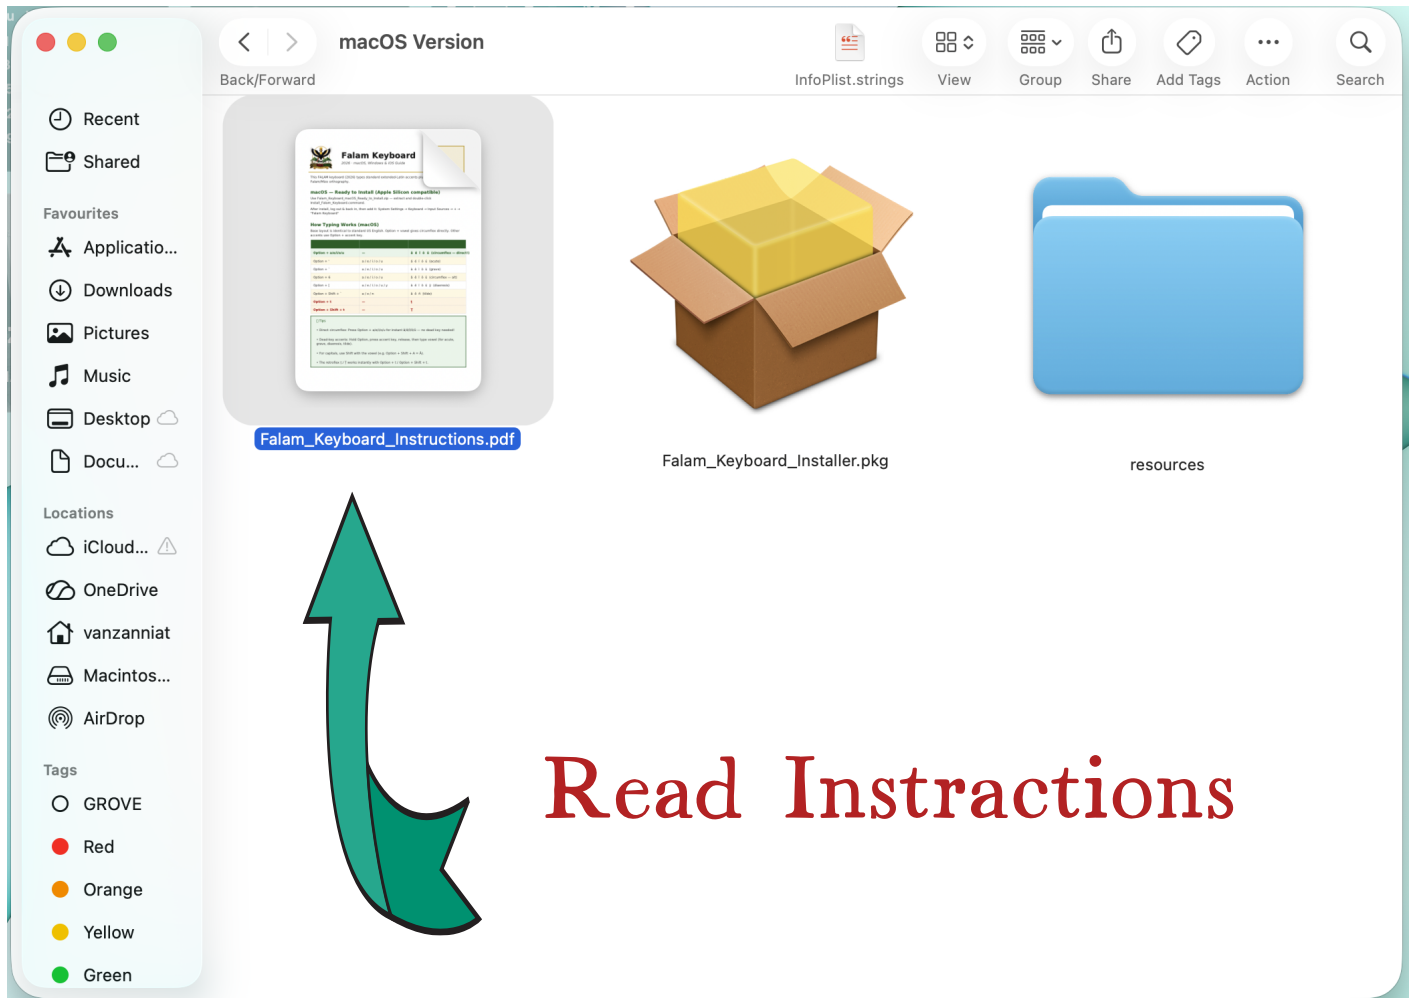

Double-click macOS Version.zip. Finder extracts it into a new "macOS Version" folder.

STEP 3

Open the Folder

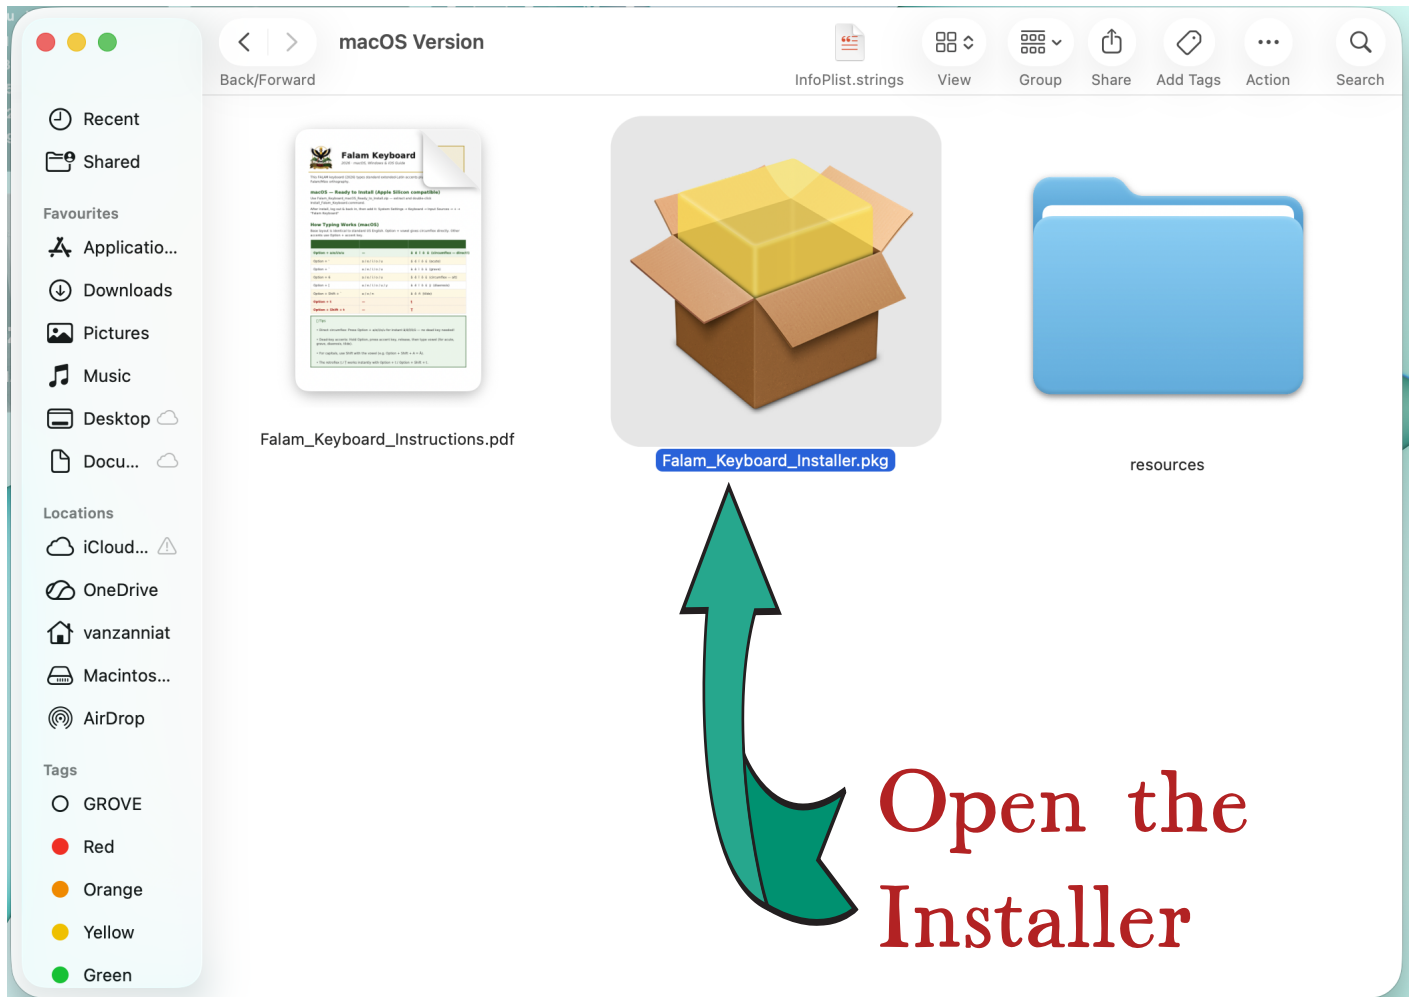

Open the extracted folder. Inside you'll find the instructions PDF, the installer package, and a resources folder.

STEP 4

Open the Installer Package

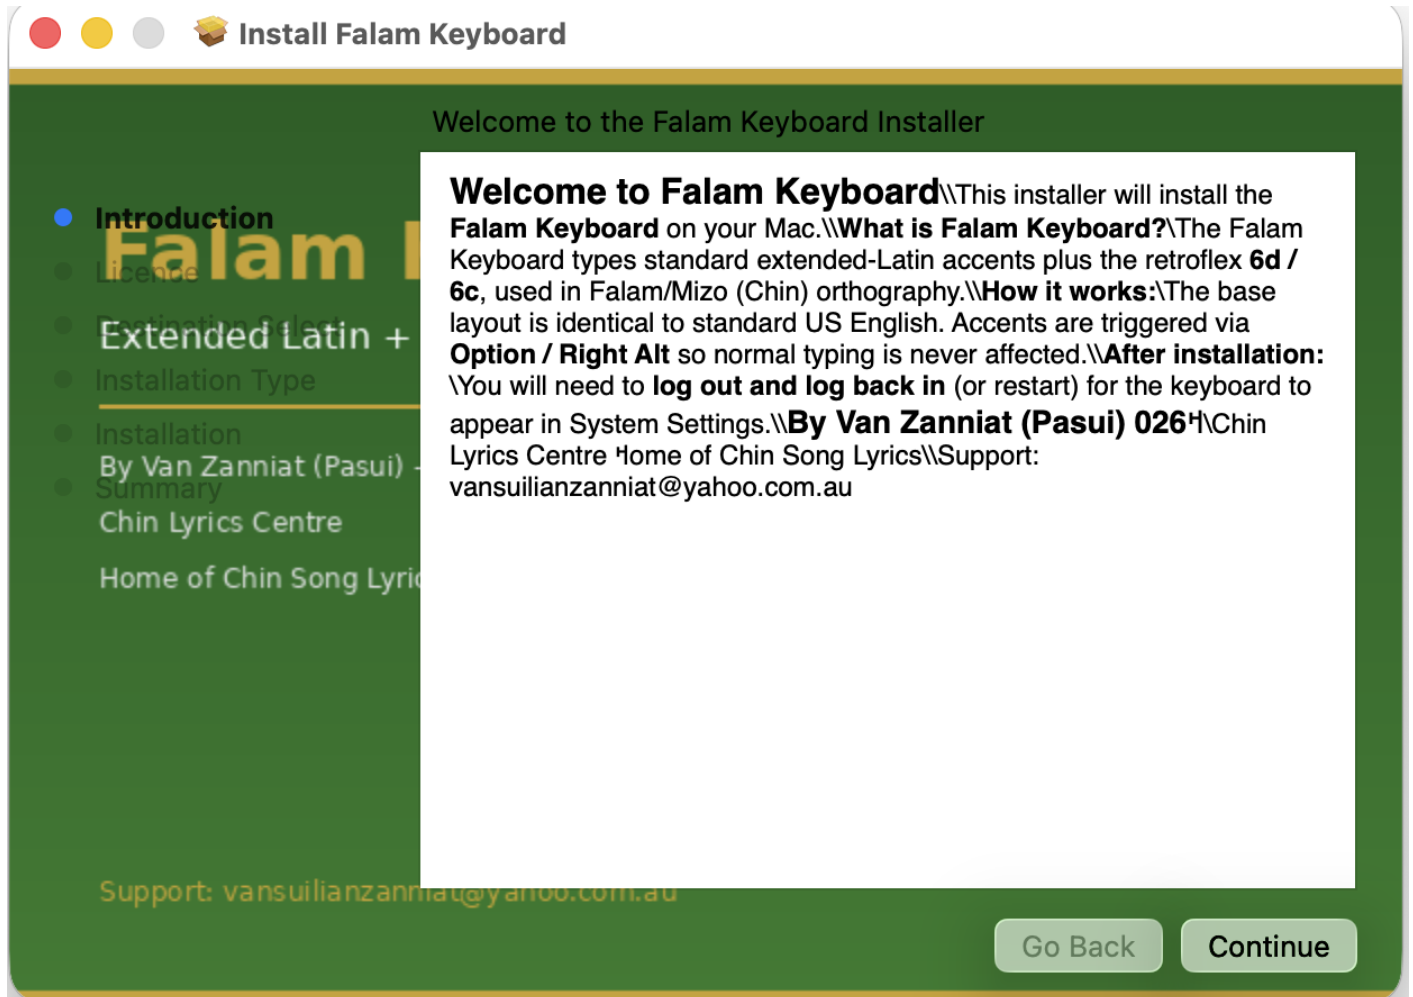

Double-click Falam_Keyboard_Installer.pkg to begin installation.

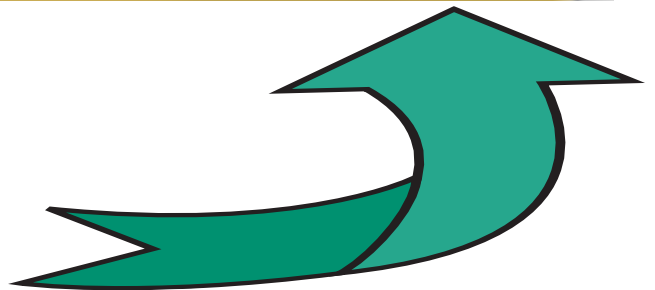

STEP 5

Welcome Screen

The installer opens with an introduction to Falam Keyboard. Click Continue.

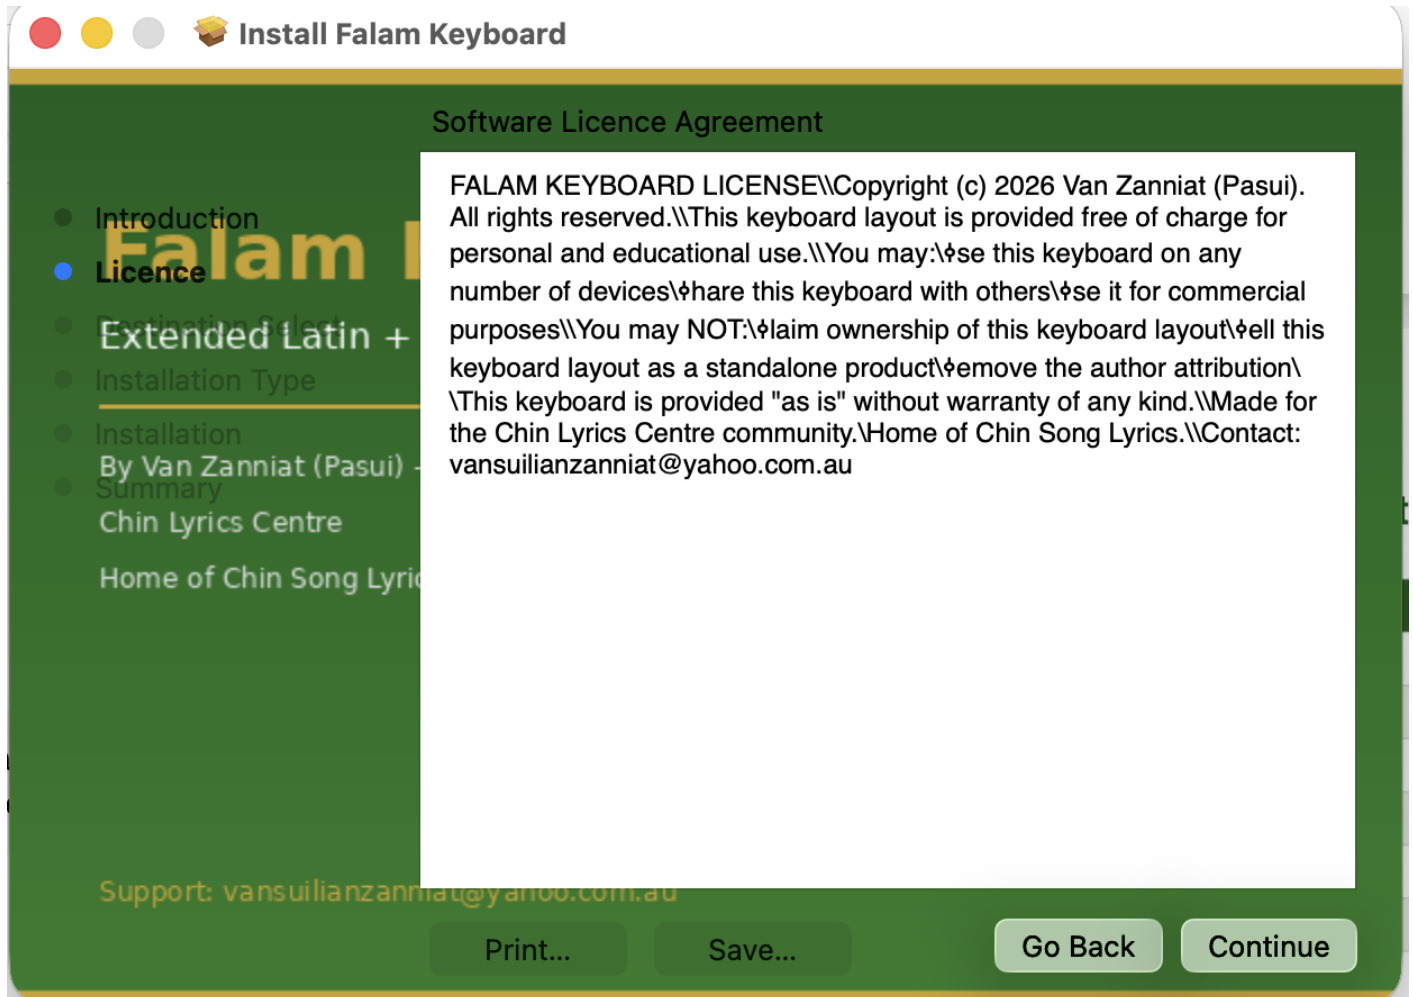

Click Continue

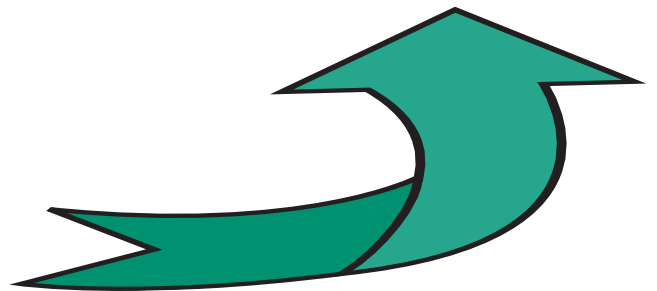

STEP 6

License Agreement

Read the Software License Agreement, then click Continue.

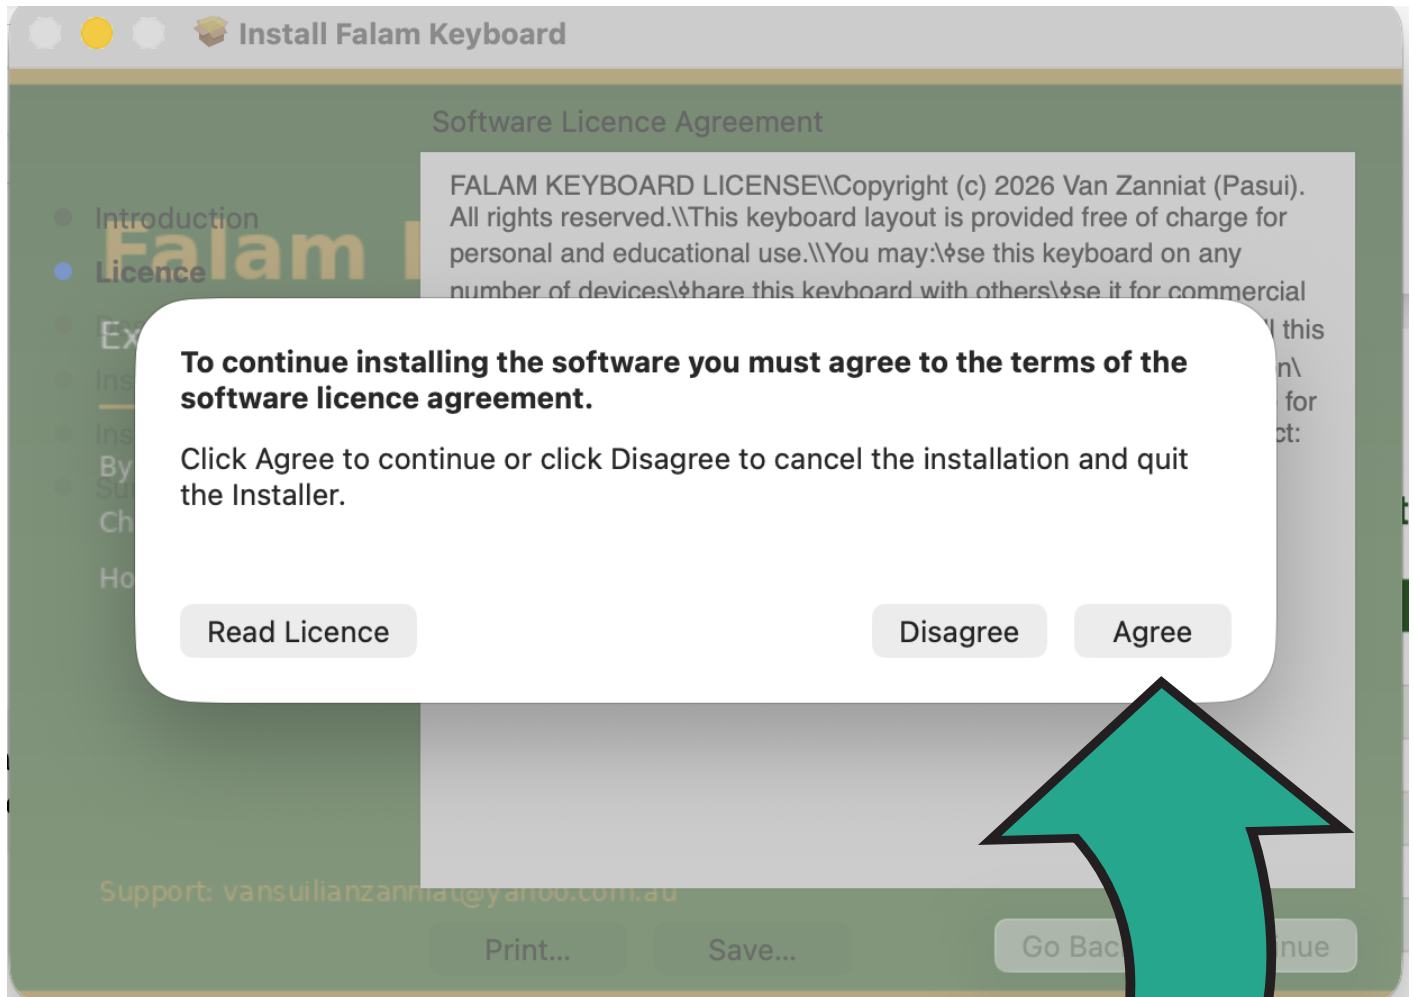

Click Continue

STEP 7

Agree to the License

A confirmation dialog appears. Click Agree to proceed with installation.

Click Agree

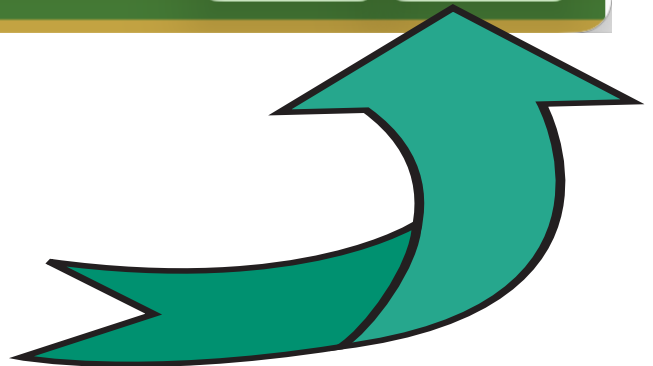

STEP 8

Choose a Destination

Select "Install for all users of this computer" so the keyboard is available system-wide, then click Continue.

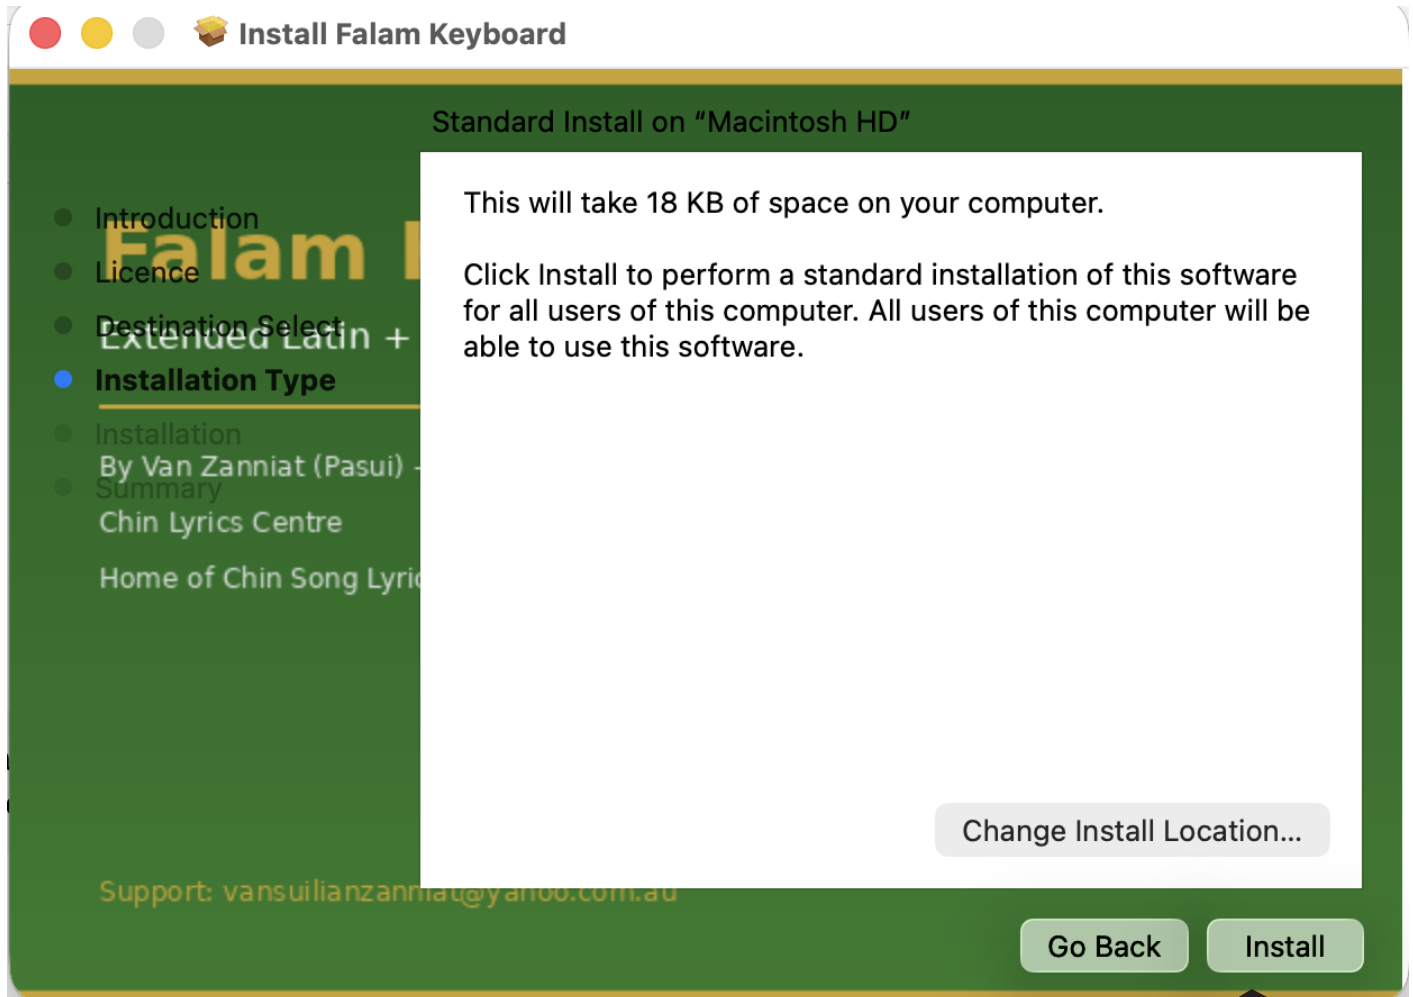

Click Continue

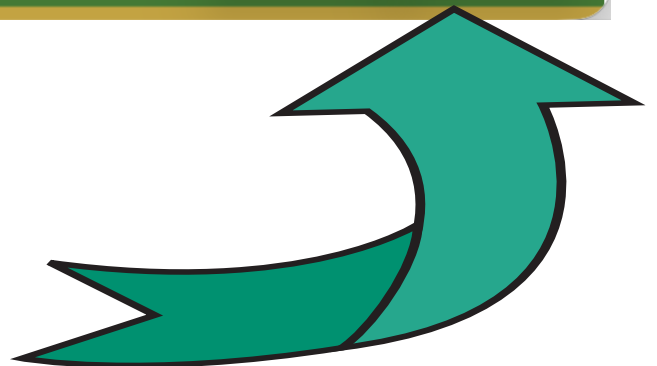

STEP 9

Confirm Installation

Review the installation summary and click Install.

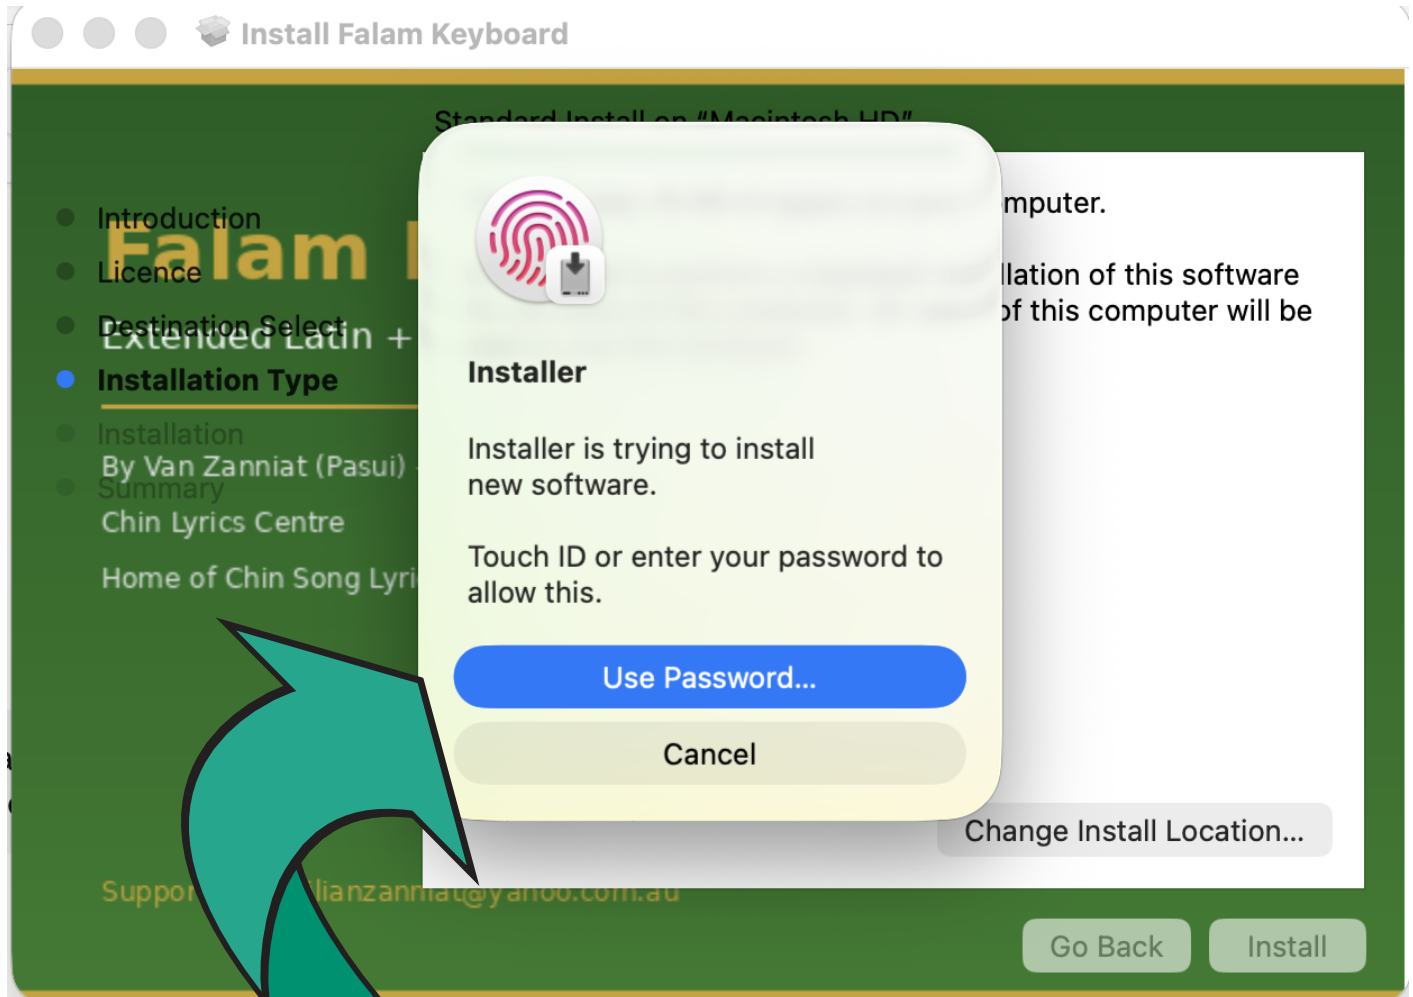

Click Install

STEP 10

Authenticate

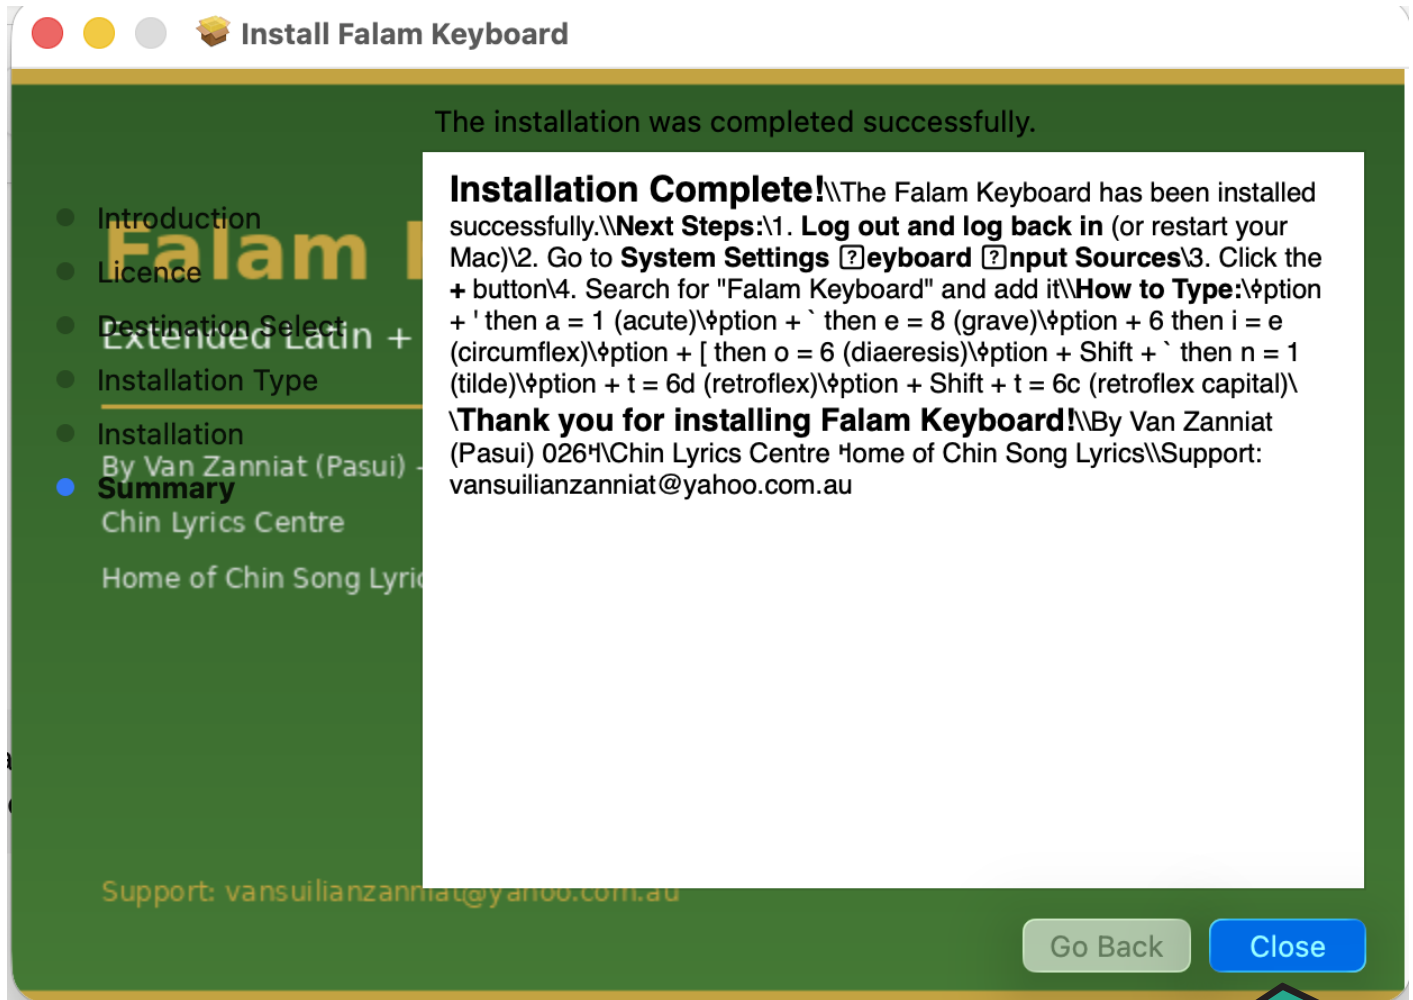

Enter your Mac password (or use Touch ID) to allow the installer to make changes.

Click and then
Type your Mac (Password)

Installation Complete

The installer confirms success and shows a quick reference for enabling the keyboard and how to type accented characters.

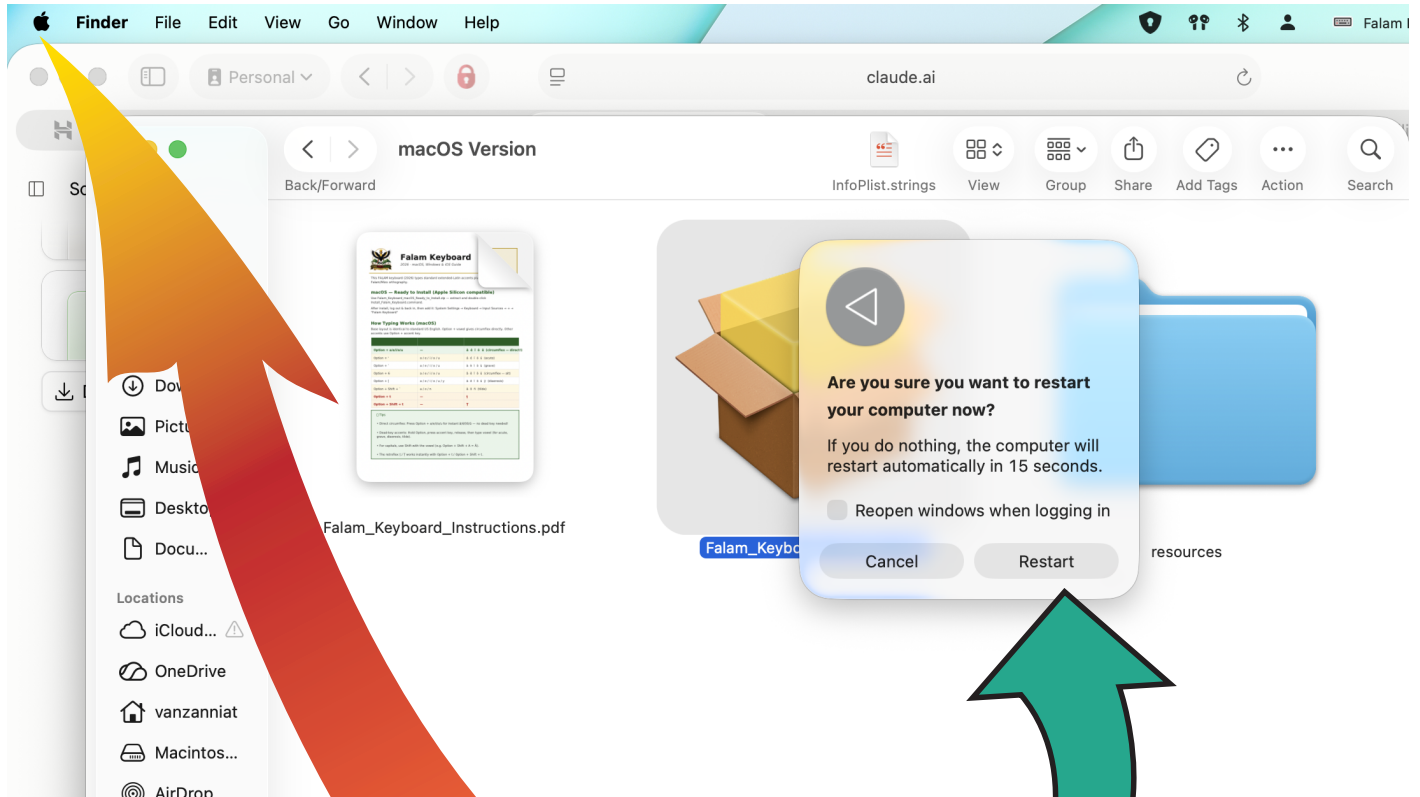

Click Close then
Exit the Installer

STEP 12

Restart Your Mac

Click Restart when prompted. A restart is required for macOS to recognize the new keyboard.

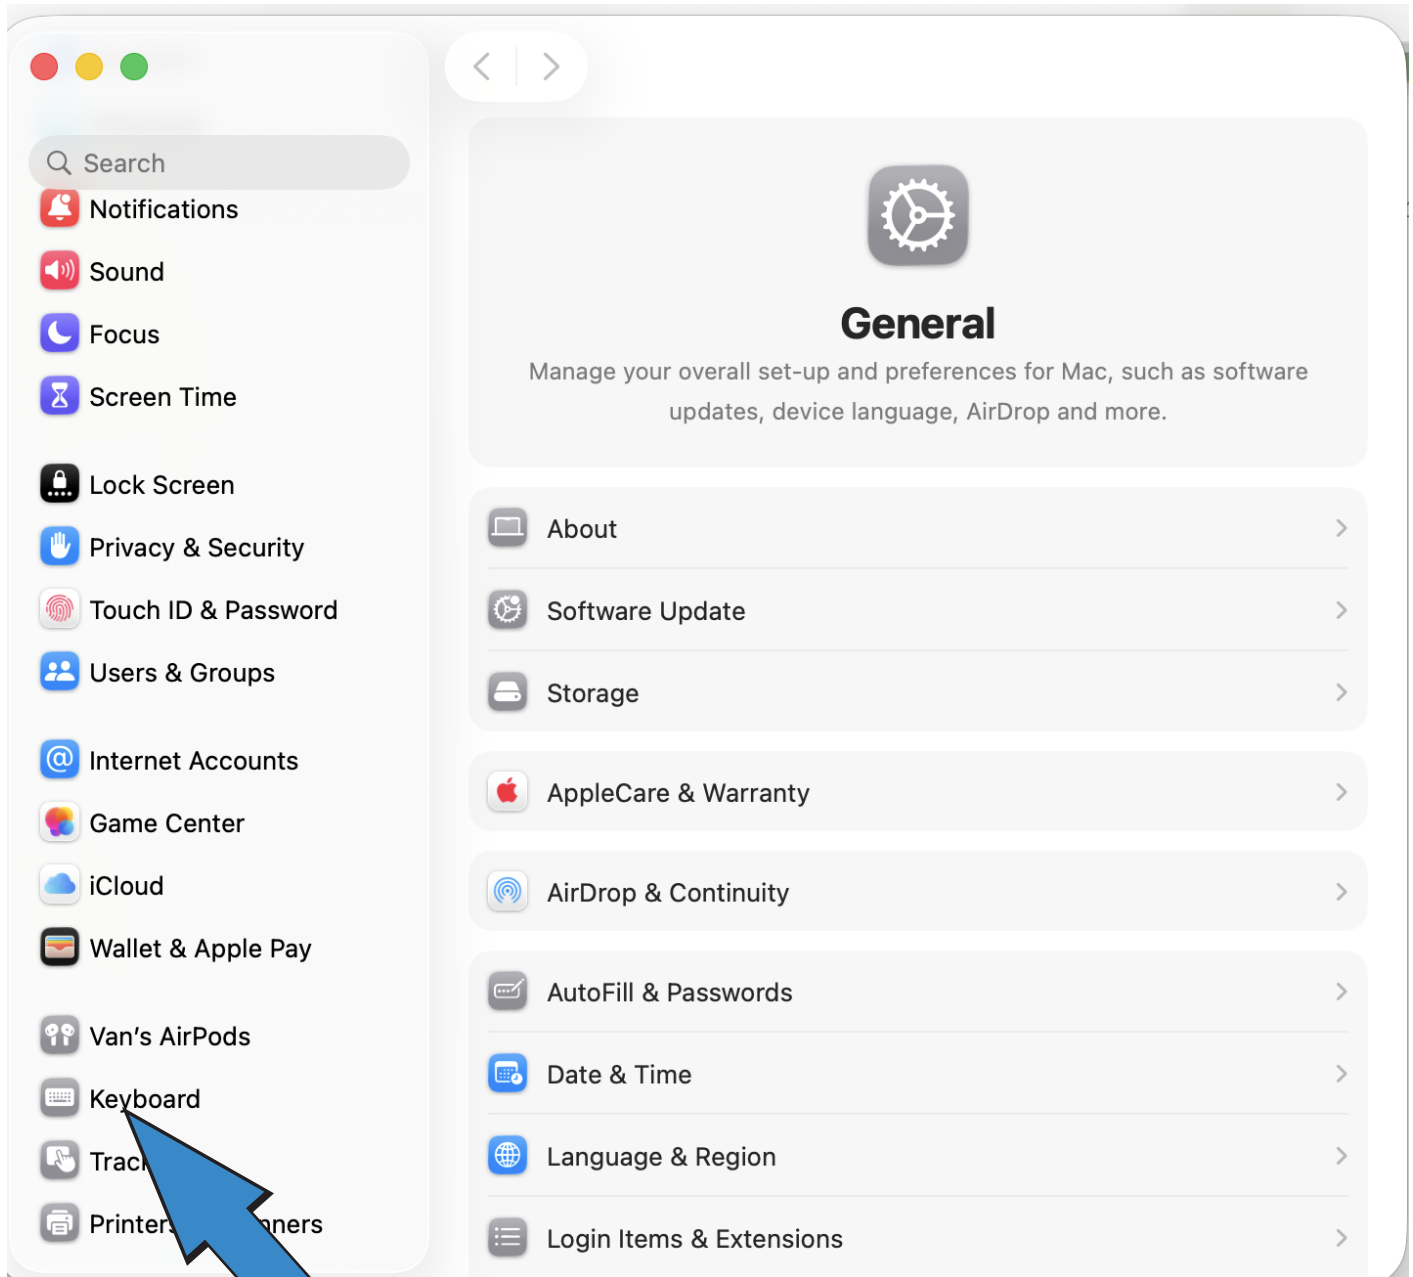

Click Apple icon
then goto restart Mac

Click Restart Your Mac

STEP 13

Open System Settings

After restarting, open System Settings and go to the General section.

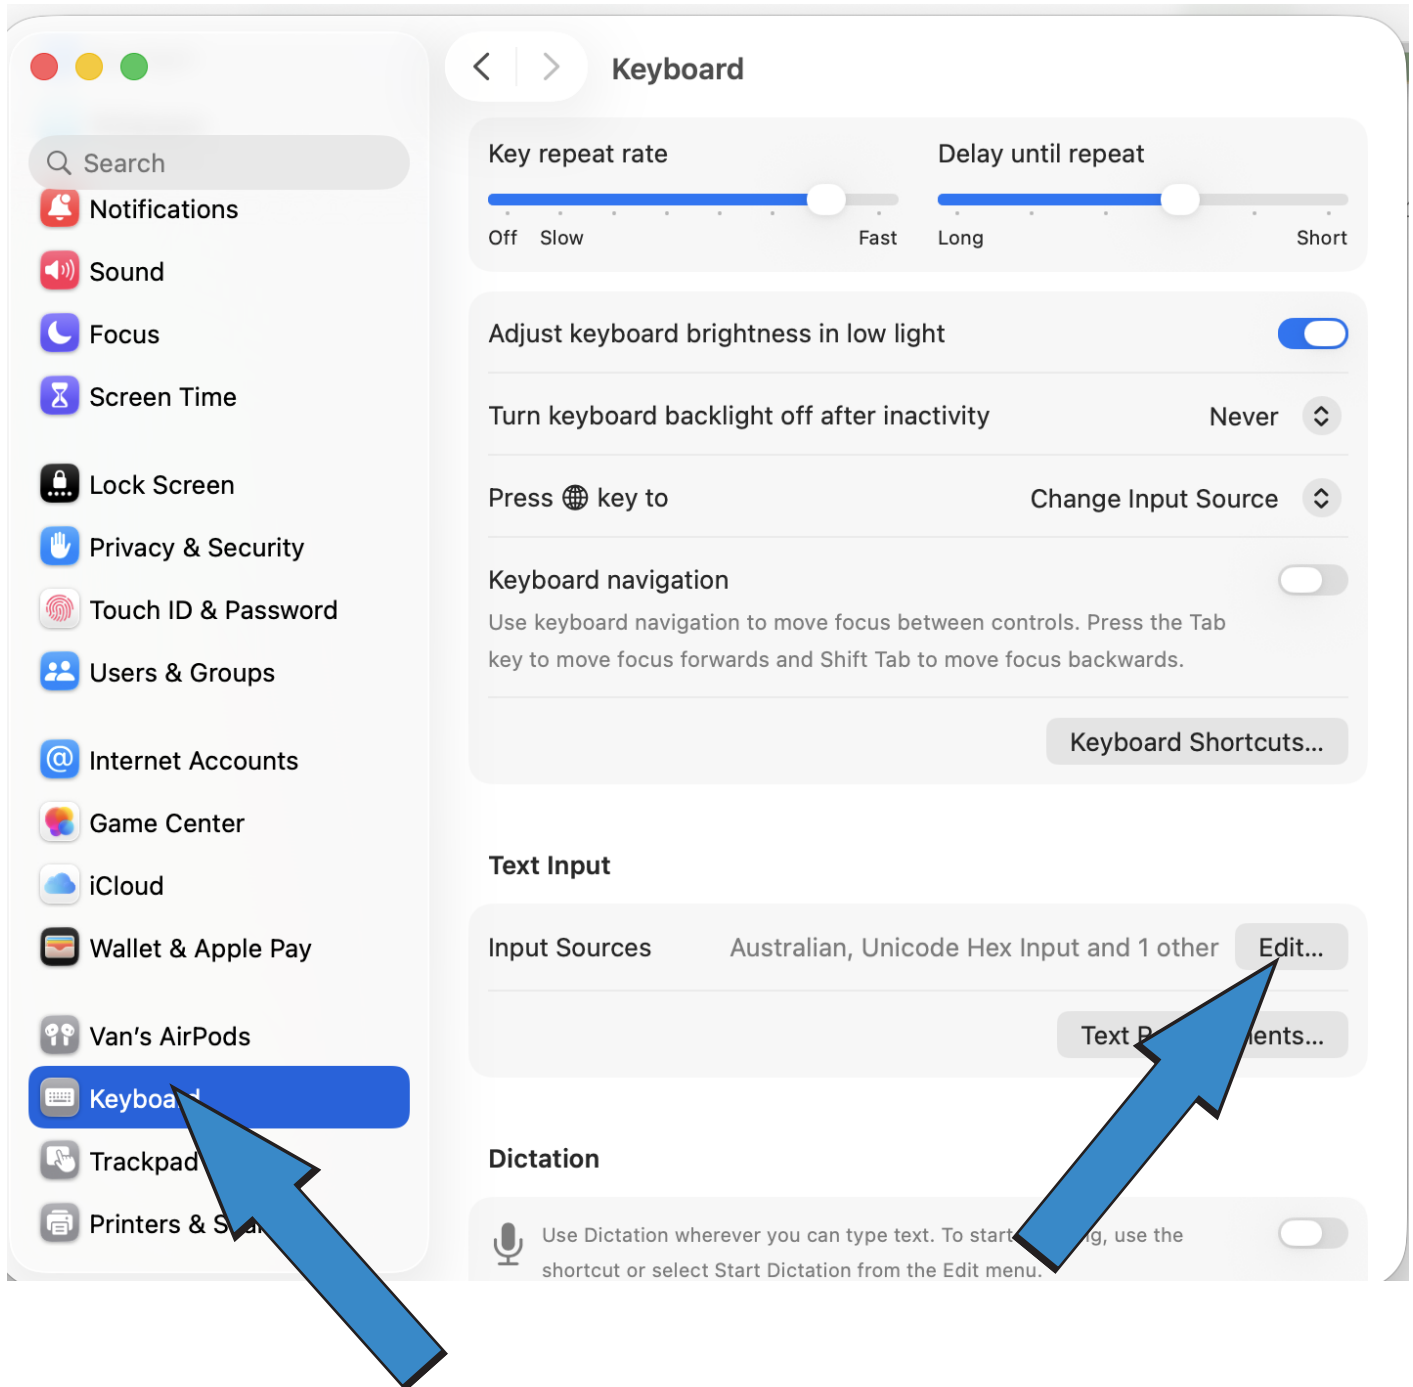

**Goto Setting After You Restart
Then Find Keyboard.**

STEP 14

Go to Keyboard Settings

In the sidebar, click Keyboard.

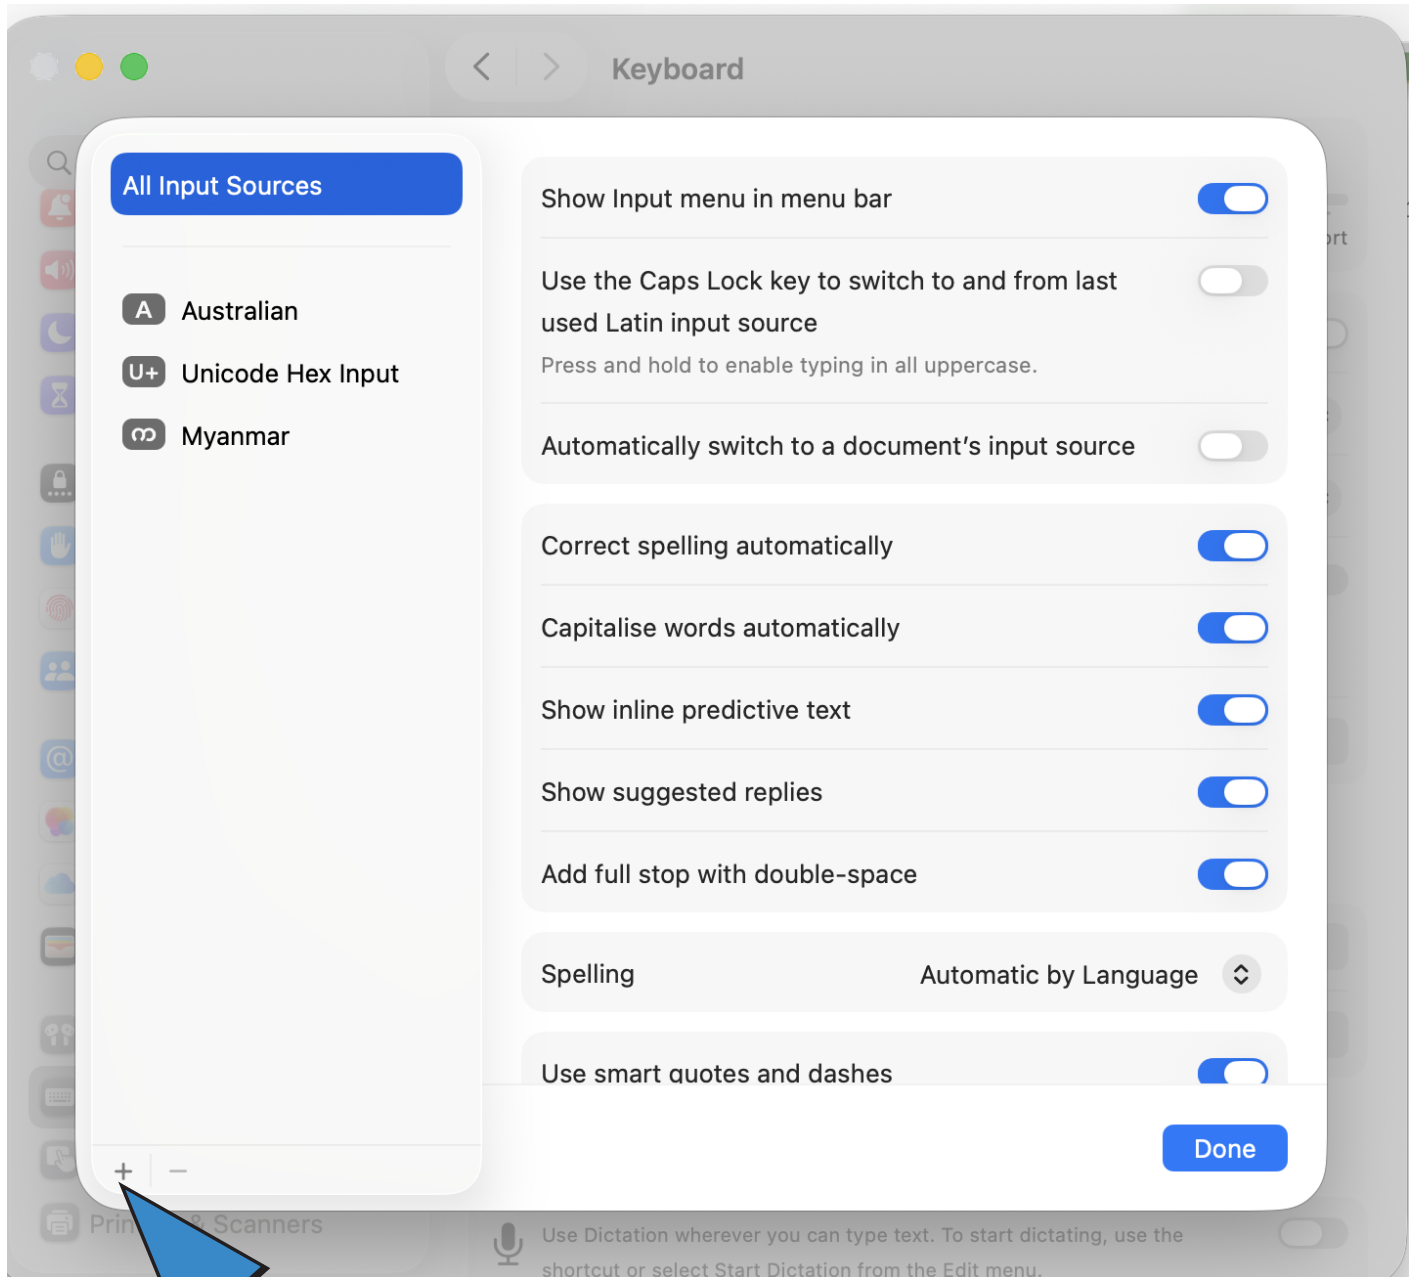

Goto Text input then Click Edit

STEP 15

Edit Input Sources

Under Text Input, click Edit next to Input Sources.

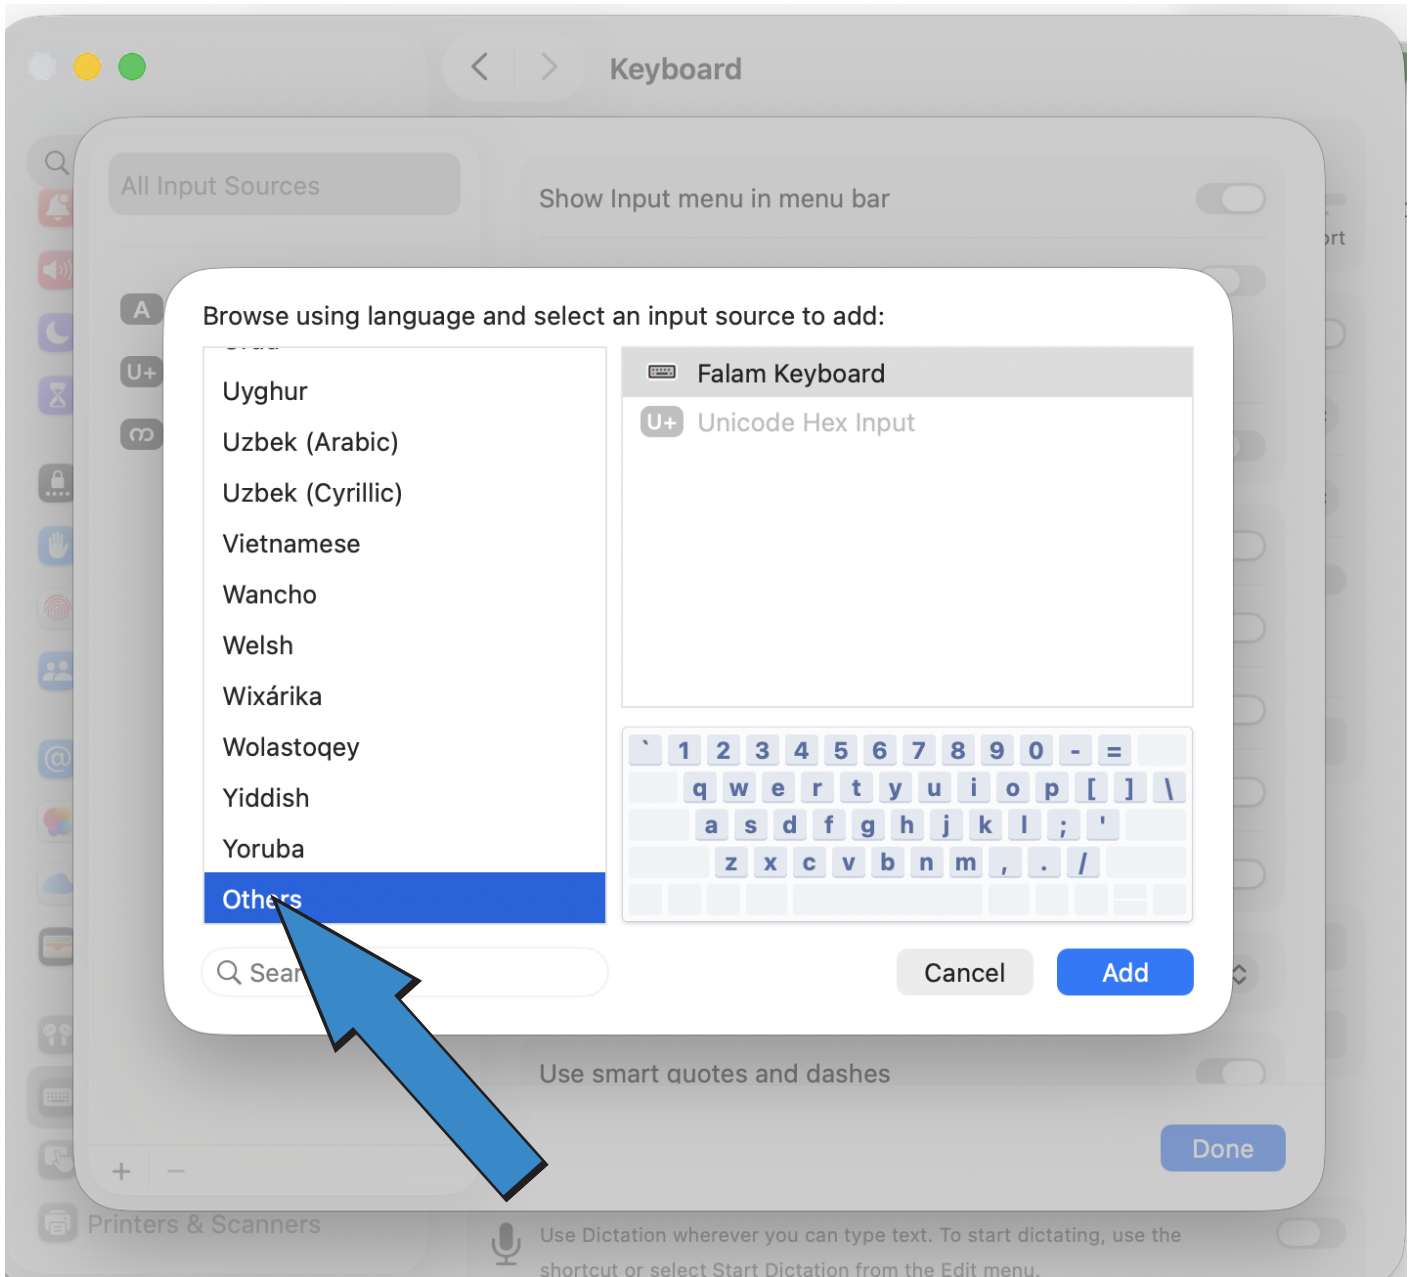

Goto + Click it + Symbol

STEP 16

Add Falam Keyboard

Click the + button, browse to "Others", select Falam Keyboard from the list, and click Add.

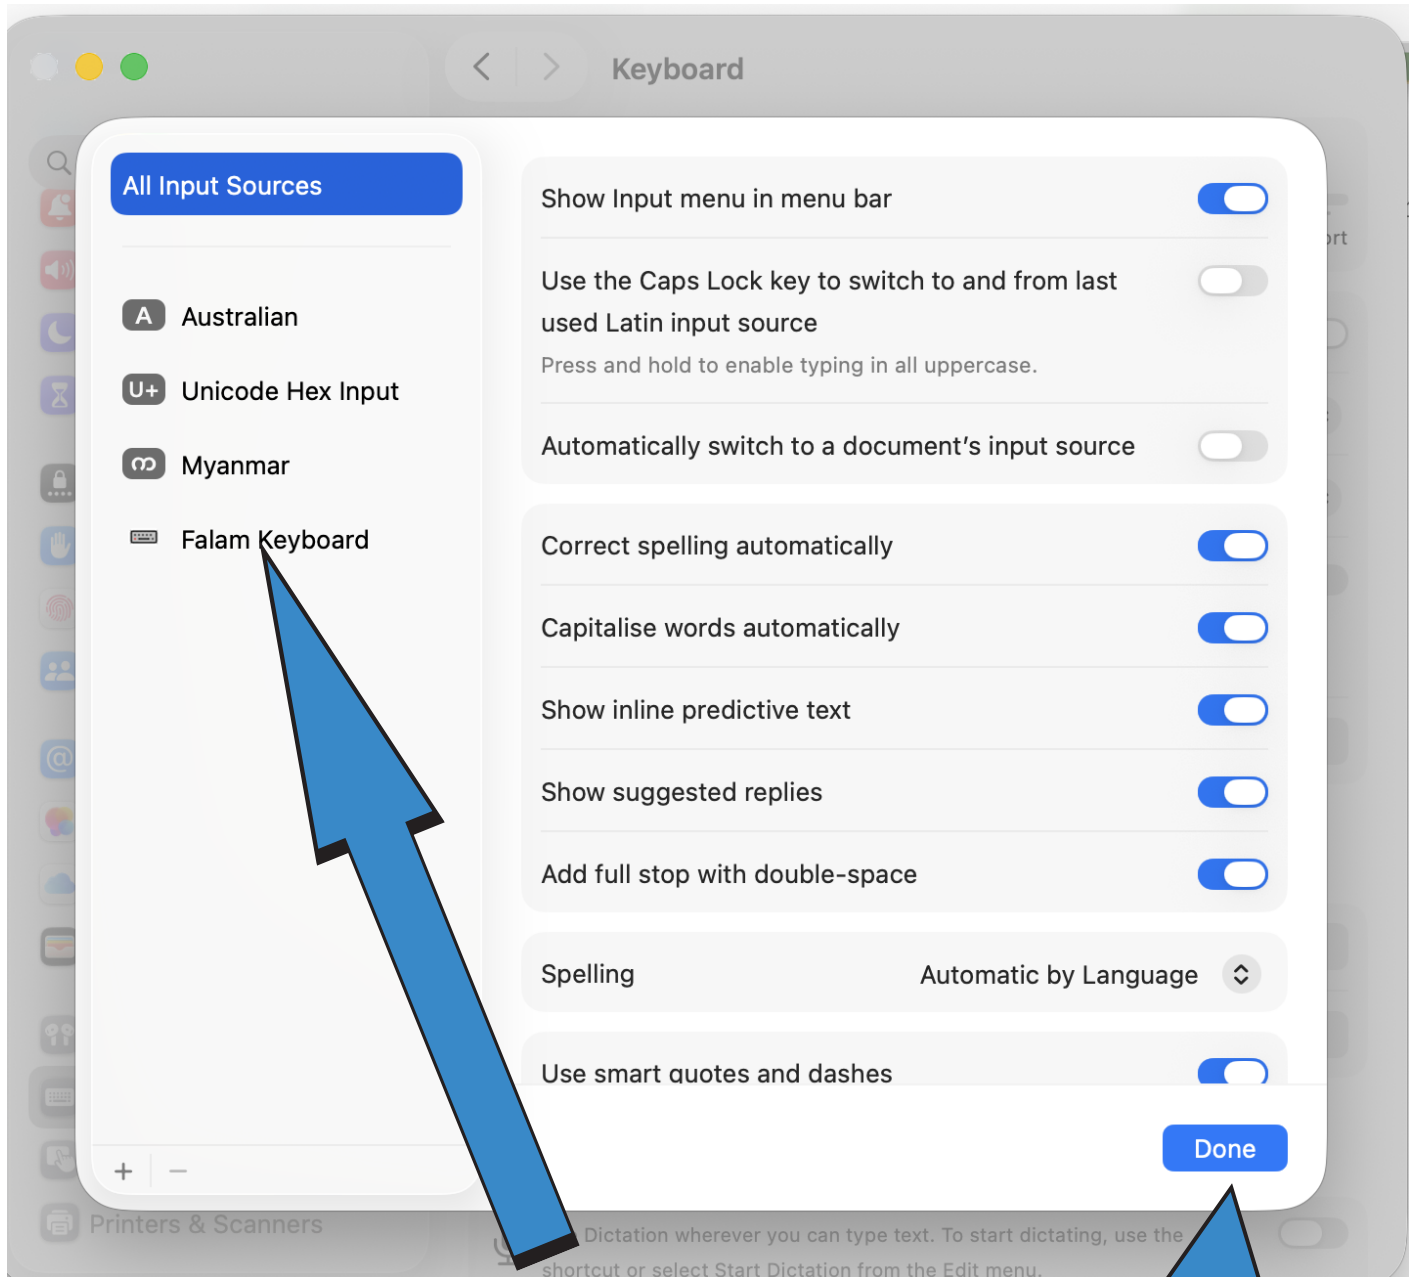

Choose Other then
Select Falam Keyboard

STEP 17

Confirm It's Added

Falam Keyboard now appears in your list of input sources, alongside your other keyboards.

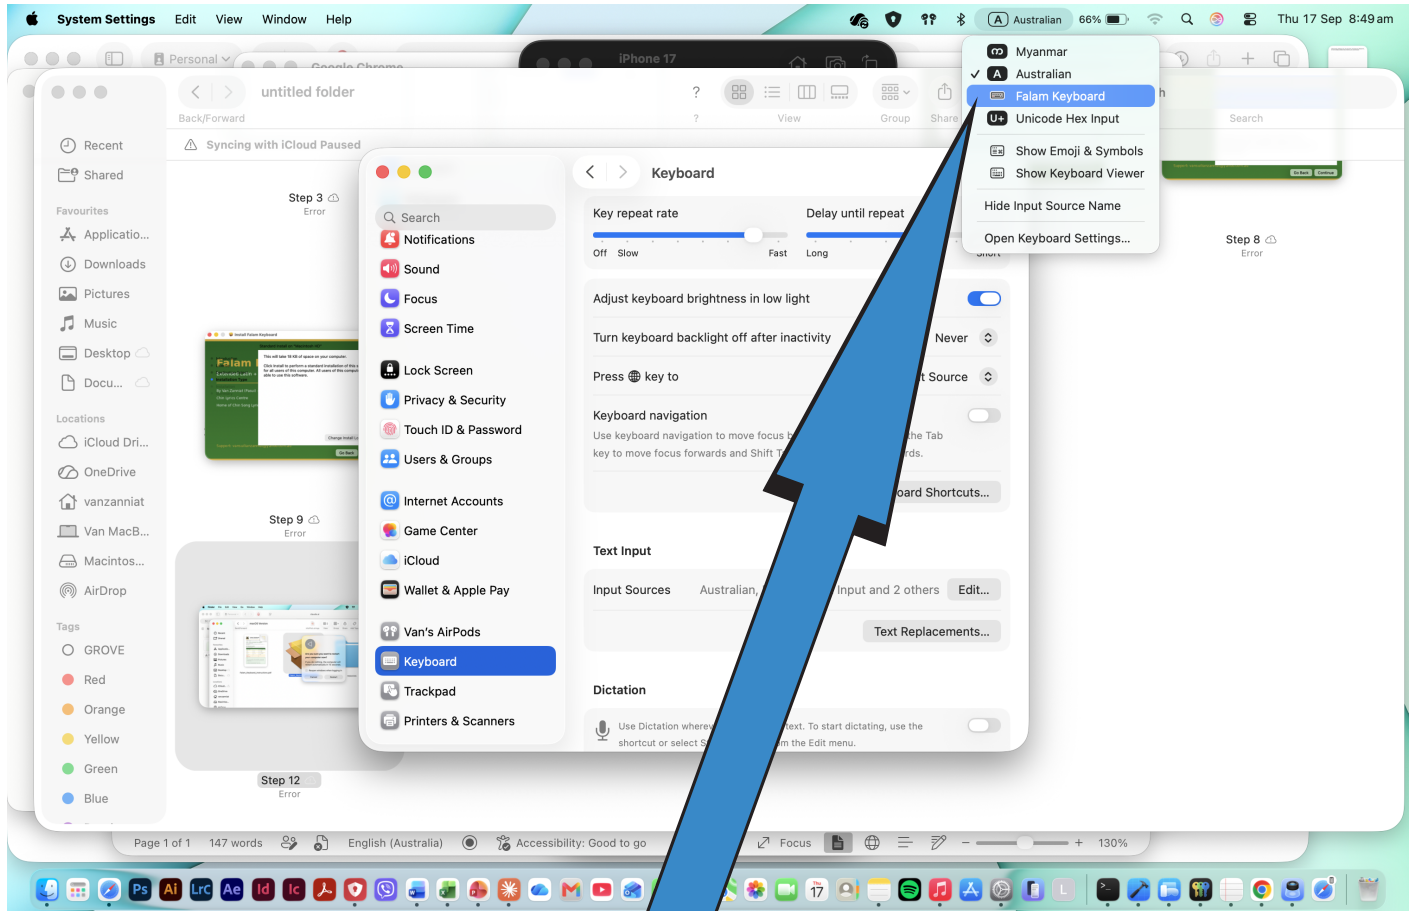

Then Now you will see
The Falam Keyboard
On your Keyboard Shortcuts then Click Done

STEP 18

Start Typing

Click the input source icon in the menu bar and select Falam Keyboard. You're ready to type — see the typing guide for the full list of accent combinations.

Then Now Choose
The Falam Keyboard.
